

V34631

Description

Bomb Pack is a unique blend of strong, long-acting buffers and an energy source to aid in stabilizing the rumen environment of stressed and sick ruminant animals at risk of developing an unstable rumen environment.

Features

- Consists of alkalizers along with long and short acting rumen buffers.
- Easy to administer by oral dosing.

Benefits

- Bomb Pack assists with restoring an optimal rumen pH of 5.8 - 6.2.
- Lifts and stabilizes the rumen pH.
- Provides a readily available energy source for the rumen micro-organisms and the animal.
- Bomb Pack creates a favourable environment for beneficial bacteria to flourish in the rumen.
- Bomb Pack stimulates the intake and absorption of water.
- Bomb Pack improves glucose absorption in small intestine.
- Provides readily available calcium and magnesium to the animal, assisting to positively impact energy metabolism, calmness, and rumen wall integrity.

Application

Mix Bomb Pack with water and drench the ruminant orally

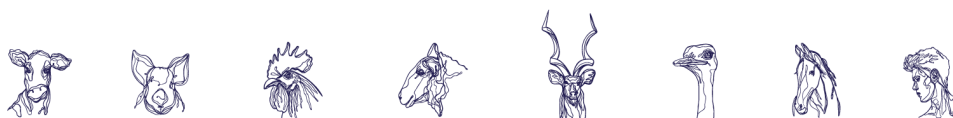

Per 50kg animal live weight: 1 scoop (50g) Bomb Pack with 100ml water
