

# Aquamin F

## Description

Aquamin F is a natural mineral source produced from calcareous marine algae (*Lithothamnion glaciale*). Aquamin F is a highly bioactive source of minerals rich in calcium for use in food, nutraceuticals and dietary supplements.

## Features

- The seaweed is sustainably harvested from the North Atlantic seabed
- Ca & Mg ions in Aquamin F are highly solubilized and bio-available
- Contains calcium (32%), magnesium (2.2%) and other trace minerals
- Fine particle size, honeycomb structure and large surface area
- Complies with European standards: GMP B2+ and FEMAS
- Certified for use in organic systems
- Halaal and Kosher certified
- Allergen and GMO free
- Suitable for vegetarians and vegans

## Benefits

- Improves plasma calcium levels.
- Results in a more favorable bone health profile.
- Reduces symptoms of osteoarthritis.
- Reduces dependency on Non-steroidal anti-inflammatory drugs (NSAIDs).
- Reduces key inflammatory mediators.
- Helps to improve gut integrity.
