

Description

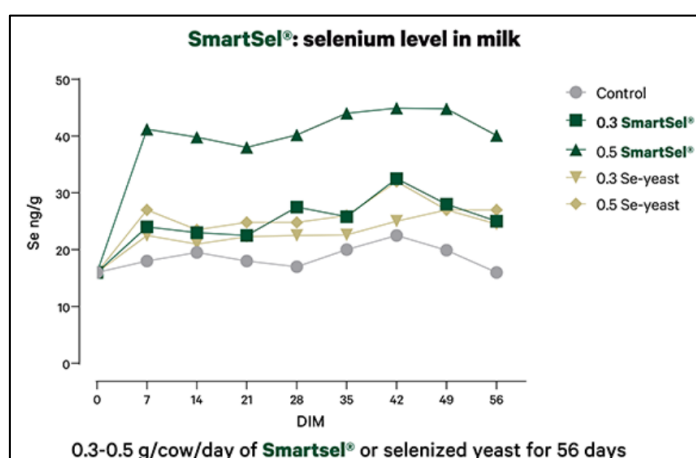

SmartSel® is rumen-protected sodium selenite, a “smart” inorganic sodium selenite product. As free sodium selenite can be reduced at ruminal level, SmartSel® selenium is microencapsulated in a lipid matrix to be highly available at the intestinal level.

Features

- Safe ingredient handling during premix manufacture
- Cost-effective solution
- Stability during pelleting and mechanical stress

Benefits

- Increased intestinal selenium absorption
- Readily available selenium source in the plasma pool
- Higher colostrum concentration of selenium
- Proven rumen protection
- High intestinal bioavailability

Application

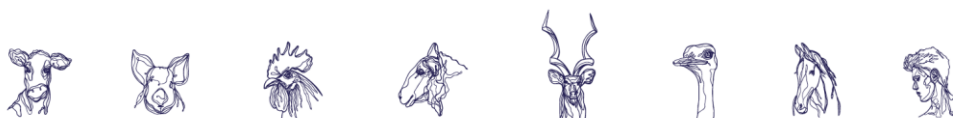

Product range	Active Metal content
SmartSel 200	2% Se

Please note that application rates are dependent upon raw materials used in premix formulations.
