

Description

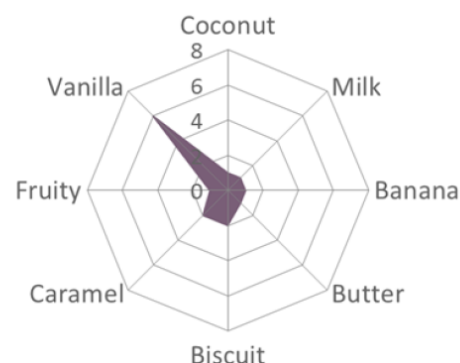

A flavouring palatant, specifically formulated to increase the flavour characteristics of animal feeds. It has a strong and distinctive aromatic profile. Covotek Fenugreek combines fenugreek and vanilla flavours.

Features

- Attractive combination of fenugreek and vanilla flavours
- Manufactured in accordance with ISO Fusion Technology ensuring:
 - ⇒ homogeneous distribution and flowability
 - ⇒ micro-encapsulated → stability, uniformity and analytical traceable
 - ⇒ Thermally protected by a retention agent
- Quantitative traceability by high-pressure liquid chromatography (HPLC).
- Compliant with EU regulations, free of GMOs and animal products and carries a FAMI-QS certificate of analysis

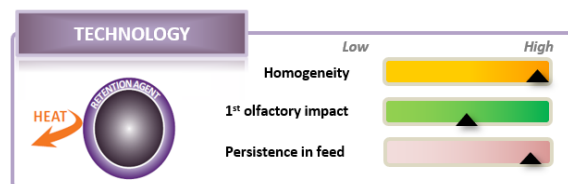

PROFILE IN FEED

PROFILE IN MINERAL FEED AT 90 g/t

Benefits

- Research indicated that dairy cows prefer fenugreek and vanilla flavours.
- More uniform feed intake improves performance.
- Improving the flavour profile of the feed can improve the feed intake of animals.
- Permits feed formulation changes with a limited risk of affecting intake patterns.
- Traditional flavours, on average, exhibit a 25% loss after pelleting. Covotek Fenugreek does not exhibit significant loss after pelleting
- Greater stability and low volatility of flavour in feed compared to traditional flavours.

Applications

Target Feeds	Inclusion rates
Complete feeds for dairy and sheep	150 - 250g/ton
Mineral feeds (licks)	300 - 450g/ton

Please note that application rates are dependent upon raw materials used in feed formulations.
