How to Apply Stalosan F

Dosage: 50g/m²

Frequency:

- **Prevention:** Every 1.5-3 weeks depending on the health status of the animal and the moisture in the bedding
- **Outbreak:** every day for 3 consecutive days and then once per week until the disease outbreak is over
- **Cryptosporidium:** Every 3rd day

Large areas: Stihl SHE 71

Large – medium targeted areas:
Stihl SR420 / Red Rhino mist blower or similar

Smaller targeted areas:
Kitchen Sieve and 50g scoop or a 700g Shaker bottle

Large areas focusing on the floor only:
Talon spreader

FOOTBATH

If boots have mud on them:
First step in a tub of water and shake the mud off.
Then step in the Stalosan F Footbath

Stalosan F covers top of boots and is in the grooves of the boots

Stalosan F does not cover top of boots and is not in the grooves of the boots
