

Acid Buf for Pigs

V 16463

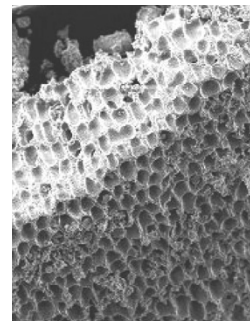

Description

Source of Calcium and Magnesium derived from Calcified Marine Algae

Features

- Acid Buf is a plant based organic product.
- Contains highly soluble Calcium (30%), Magnesium (5.5%) and other minerals.
- Fine particle size with a honeycomb structure gives a large surface area.
- Organic hydrogel structure in Acid Buf reduces inflammation.

Benefits in piglets

- Promotes calming effect when newly weaned pigs are moved to group housing
- Has a lower Acid binding capacity compared to limestone
- Improves skeletal development

Benefits in Sows

- Reduces stress and promotes calmness before, during and after farrowing resulting in reduced overlying
- Increases calcium and magnesium content in colostrum
- Helps to reduce farrowing time resulting in reduced still births
- When fed to sows, Acid Buf positively impacts piglets in terms of born alive, numbers weaned and weaning weights.
- Helps to reduce the severity of gastric ulcers

Applications

Target Feeds	Recommended inclusion of Acid Buf (kg/ton of final feed) *Formulate into feed, maintaining Ca specification
Creep and Weaner diets	4 kg/ton
Gilt Rearing diets	5 kg/ton
Dry Sow diets	5 kg/ton
Lactation diets	5 kg/ton
